OBJECTIVE

Creating visual illustrations, providing pictorial explanations to problems, creating an online presence for both individual and corporate bodies and critical thinking in common problems to proffering solutions and adding value wherever I find myself.

EXPERIENCE

July 2019 – June 2020
ICT - Cross River University of Technology

Web Developer and Computer Instructor

- Emphasized web etiquette and practical applications of technology for professional use. Planned and implemented curriculum to teach up-to-date technology to 20 students.
    - Taught web programming languages according to age group and ability in bootcamps.
    - Designed classes online for non computer science students.
    - Worked to implement computer literacy program and technology use into day to day instruction.
    - Collaborated with vendors to locate replacement components and resolve advanced problems.
    - Monitored systems in operation and input commands to troubleshoot areas such as LAN.
    - Assessed system hardware and software and suggested modifications to reduce lag time and improve overall speed.
    - Removed malware, ransomware and other threats from laptops and desktop systems.
    - Configured hardware, devices and software to set up work stations for employees.
    - Worked with software development team on reported errors and bugs on newly released software and assisted in deployment of release fixes.
    - Engaged end-users and answered questions via email, phone, website live chat and in forums.
    - Responded to support requests from end users and patiently walked individuals through basic troubleshooting tasks.
    - Explained technical information in clear terms to non-technical individuals to promote better understanding.
    - Collaborated with product management to design, build and test systems.
    - Created databases, data entry systems, web forms and other applications for diverse uses.
    - Designed classes for Microsoft office for 20 students.

- And any other duty assigned to me.
